- Protect from freezing
- Flow rate (GPM) : 2-5
- Line Size : 1/2" (15/21) ou 3/4" (20/27) .
- Vérification du niveau restant par transparence.

Applications

The 40,000 gallon water volume treated is ideal for small commercial applications, foodservice applications, and residential applications. It is primarily used in residential applications where a replacement cartridge will last approximately 8 to 10 months depending on water usage characteristics. The SC-605 is ideal for any commercial or foodservice application where the water flow rate averages 1-5 gpm and does not exceed 20 gpm. If the average flow rate is below 1 gpm, use the ScaleStick.

Install

Single

Delivery

comes in generic cardboard box
complete ready to install
instructions of use include
[Replacement cartridge : RSC-5](#)
