

# SC-610 HBW

## Standard features

Model	Filter Housing Head	Sump	O'Ring	Bracket	Screws
SC-610 HBW	NC	NC	NC	Stainless Steel	Stainless Steel

## System specifications

- Weight : 6 lbs
- Life rate:65,000 Gallons
- Maximum Feed Pressure : 150 psi
- Maximum Feed Temperature : 160 °F
- Protect from freezing
- Flow rate GPM : 2-6
- Line size : 3/4"

## Applications

The HBW is used in hot water feed applications where the incoming feed water is heated. This unit is used in foodservice applications after the hot water heater and before the booster heater feeding the dishwasher. It is the only unit which is not available in a clear housing. When possible, use a SC-610 on the hot water heater feed line. This will protect not only the booster heater and dishwasher, but the hot water heater as well, and will allow for visual checks of the product level.

## Install

Single

## Delivery

Comes in generic cardboard box  
ready to install

instruction of use include

Replacement cartridge : RSC 10
